

Bearded Dragon

Reptile Care

**Temperature:**

Hotspot of 100°-105° with an average temperature of 85°.

**Habitat:**

Dragons are desert dwellers who enjoy safe sand substrates. Provide a basking high temperature area at one end of the enclosure with branches or other climbing apparatus under it. A hide should be present on the cool side of the enclosure.

**Experience Level:**

Novice

**Lighting:**

Bearded Dragons need 10 hours of lighting per day. Heat lamp appropriate for generating hotspot of around 100°, along with UVB bulb to provide much needed Vitamin D. For added temperature a red heat lamp can be used overnight.

**Staple Diet:**

Crickets, Mealworms, Superworms, Hornworms and Mixed Greens (Timberline Reptile Salad)

**Supplement:**

Waxworms (to add fat) and CalciWorms® (to add calcium in a natural method)
