

Tarantulas

Reptile Care

**Temperature:**

Between 70°-80°.

**Habitat:**

Sphagnum moss or potting soil are great options for substrate. Many tarantulas burrow, so will require deeper substrate depths.

**Experience Level:**

Intermediate

**Lighting:**

Tarantulas should be kept away from direct sunlight and other light sources.

**Staple Diet:**

Crickets, Mealworms, Superworms, Hornworms and Flightless Fruit Flies

Supplement:

Waxworms (to add fat)
