

Tortoises

Reptile Care

**Temperature:**

Temperature varies depending on the species, but typically they are best kept between 60°-90°.

**Habitat:**

Depending on the species, different substrates may be better for some than others. A sand and peat moss mixture is a common substrate for tortoises kept indoors. If kept outdoors many tortoises will burrow in the soil to help regulate their temperatures.

**Experience Level:**

Intermediate

**Lighting:**

When kept indoors, UVB lighting is necessary along with a heat lamp to meet ideal temperatures.

**Staple Diet:**

Mixed Greens (Timberline Reptile Salad) and Nopales Cactus (Timberline Reptile Cactus)

Supplement:

Calcium supplement
